The unofficial 1.07 patch mod, Diablo2FuryWithin1.07The rather astute but still humorous piece offers a brief take on changing cultural attitudes that have at times confused the distinction between the religions of the Bible and the religious ideology of Christianity. In the second section, one of the principal aims is to stress what is at stake in the debate over evolution and to vindicate the American scientific community in rejecting as unscientific claims of atheism that don't stand up to scrutiny. Mr Hitchens begins his section by examining the emerging relationship between religion and science and raises the question of whether those professing a belief in God as defined by the Bible are being intelligent or irrational. He argues that the association of religion with science is still strong and points out that the words 'religion' and 'science' are often used as synonyms. The idea that there could be an intelligent creator of the universe is common to religious belief and to the philosophies of science. It is true, he says, that the overall purpose of science - the search for a natural explanation for things - could not be expressed in terms of a belief in God. However, scientists have given reasons for a belief in God. Mr Hitchens says there are also reasons for believing in science. The first is that it works: there is evidence of its success. The second is that it reflects philosophical and ba244e880a
