In the meantime, you can use the MirrorOp Sender receiver to connect with your computer or PC. If you want to get MirrorOp Sender for Android, please read the following step by step installation guide. You can start using this app as soon as you download it. Stenotrophomonas maltophilia bacteremia in a patient with cystic fibrosis: review of literature. A 14-year-old boy with cystic fibrosis (CF) was admitted to the hospital because of cough and fever. Bacterial isolation from blood culture yielded Stenotrophomonas maltophilia (S. maltophilia). The patient was treated with ceftazidime, but developed high fever and acute respiratory distress syndrome. Therefore, ceftazidime was replaced by trimethoprim-sulfamethoxazole, but his condition did not improve. The patient died of septic shock and multiple organ failure. S. maltophilia has rarely been reported as a causative pathogen of CF-related sepsis. The patient in this report developed S. maltophilia bacteremia without any predisposing cause for infection. Review of literature disclosed 13 previously reported cases with similar outcomes. S. maltophilia bacteremia in a CF patient may be associated with poor prognosis due to high-grade infection, as evidenced by a fatal outcome. If you look at one of our pods, you'll see that we do a lot of things on a host and a
