A: In addition to the "traditional" offline installer from Adobe, there's also an online installer which gives you the benefit of immediate updates when a new version comes out (since you don't need to download and install a new copy of the application). As long as you have the Adobe Download Manager installed, you can install the latest version by simply downloading the latest installer file from the Adobe website. You can also use the link below, which will take you straight to the latest available version (if you're not already on the Adobe site): (assuming you're running a 64-bit machine, that is) A: It is now possible to create an offline Adobe Photoshop Cs5 program by using the latest Adobe Photoshop Cs5 portable. Here you can download it: Step 1. Download the “Adobe Photoshop Portable CC 2013” installer from Adobe website. Step 2. Extract the installer and install the program according to your preferences. Step 3. Enjoy your program. A: I have not tried this, but here is a link that does it: 2d92ce491b
