Anyone who has ever seen the movies of Mark Wahlberg knows that his nickname is Marky or Mark the Shark. It's only fitting for this man to live up to his name. The Shark is the best in the business, and I mean in EVERY business. From The National Football League to The Major League Baseball, the Shark is the only name you will see I am very proud to inform everyone that The Marky Mark is a cool guy! He really cares about people, and is even better at handling them than I am. Marco Bruno Self-confessed speed burner and data-junkie, Marco loves nothing more than keeping track of his high-speed internet browsing. His favorite sites include Ubuntu Linux, Digg, and

Slashdot. Yes, I'm a fan! The man needs no introduction. He is brilliant and continues to amaze the world with his intelligence. I admire his dedication, and wish he would give me his feedback. I hope that the Marky Mark continues to do what he does best. Show the world that it is about the community, and not just about him. Babs Babs is a student in high school. She loves Ubuntu Linux and uses it every day. No wonder I want to be popular. I just use Ubuntu Linux for a lot of stuff. I use it for my homework, to practice, to find the right stuff and so on. Everyone should use Linux. I have no idea why I haven't got any friends. It's not because of my looks, it's because I'm awesome! One of the things I want the Marky Mark to do is introduce me to his friends. I want to be accepted like him. I really need to meet some people. Alice "Once again, a new Ubuntu Linux is for a new way of thinking. I'll

install it on my computer." That's what Alice says when she logs on to the Internet. "All right, what should I do?" She asks herself. "I'll just install Ubuntu Linux on my computer" she says, "I can't get anything done unless I do!" With that thought in mind, she runs to her computer. But what should she do?

edition of SC Magazine, which means the Linux Fans' Spring Edition or F-LSE, will be launched this year. With LinuxWorld2009 and FUDCon Europe in the past, we can see that many new developers and projects are coming out. SC Magazine will report all of it, also as a new development model for SC Magazine project. In April, I wrote about "SC Magazine: A new era", and now I write about "SC Magazine's new development model". There are more choices with the Ubuntu Linux Wallpaper. OctavioDaniel is the author of many books on Linux, FOSS and Open Source. You can see the history of the last time when I'm posting a new article to our site, and let's see how many people find it and read it. Just like what we do in open source, they can improve and

In F-LSE, we will talk about popular projects and new projects. I hope that you will find what you are looking for in this article. Ok, let's start our discussion on the Ubuntu Linux Wallpaper. First of all, you can choose the wallpaper by using an applet. This applet
