Remove Java application security questions in nokia 40 v3 mobile phones. Download and install the patched mobiMb media browser and hex editor I have. Connect your phone to a personal computer and start the editor. Select the desired block or file to edit and click Edit. The Save as dialog box will appear. In the New Save As field, enter a filename, such as test.hex, and click Save. This file is needed in order to restore your phone after an update. To do this, you will need to click Tools->Restore Phone. Now that you know how to recover data, you can start updating your nokia 40 v3 mobile phone. 1.
